Professional Summary

Detail-oriented Computer Science student with a strong foundation in full stack web development and software engineering principles. Experienced in building scalable web and Android applications using modern technologies. Demonstrates strong problem-solving skills, adaptability, and a continuous learning mindset, with hands-on experience in academic and real-world projects.

Education

Bachelor of Engineering (B.E) – Computer Science and Engineering
Bannari Amman Institute of Technology
2025 – 2029

Relevant Coursework

- Data Structures and Algorithms (Basic & Learning)
- Object-Oriented Programming
- Database Management Systems
- Operating Systems
- Computer Networks

Technical Skills

Languages: JavaScript, Python, C

Frontend: React.js

Backend: Node.js, Go

Mobile & Tools: Android Studio, Firebase

Databases & Tools: SQL, Git

Projects

DialOS (Android Application)

Developed an Android application that replicates the iOS voicemail experience on Android devices. Designed intuitive UI/UX, implemented authentication, cloud-backed data handling, and real-time services to enhance user interaction.

Technologies: Android Studio, Gemini, Firebase

Institutional Web Applications (3 Projects)

Contributed to the development of three production-grade institutional web applications scheduled for deployment within the college environment. Worked on frontend and backend modules including authentication, form handling, role-based access, and database integration, ensuring scalable and maintainable architectures.

Technologies: React.js, Node.js, Go

Certifications

- AI Fundamentals – IBM SkillsBuild
- Operating Systems Basics – Cisco
- Cybersecurity Virtual Experience Program – Deloitte

Core Strengths

- Problem Solving
- Analytical Thinking
- Quick Learner
- Adaptability
- Effective Communication
