SUMMARY

B.Tech AIDS student specializing in **backend architecture**, **full-stack systems**, and **intelligent system integration**, with a strong foundation in problem-solving, Data Structures & Algorithms, and DBMS. Delivered 3+ production-grade projects focused on secure APIs, scalability, and automation.

TECHNICAL SKILLS

Languages: Java, C, Python, JavaScript, SQL

Frontend: React, Tailwind CSS, HTML, CSS

Backend: Node.js, Express.js, Golang, Gin Framework

Databases: MySQL, MongoDB

Tools & Technologies: Git, Postman, Docker, JWT, WebSockets, Socket.IO, REST APIs

Core Competencies: Data Structures & Algorithms, Object-Oriented Programming, DBMS, API Integration, Authentication & Authorization, Full-Stack Development, Backend Architecture

PROJECTS

CampusMithra | *React, Zustand, Tailwind CSS, JWT, Golang, Gin* | [Live](#) | [GitHub](#) 2025

- Developed a comprehensive web application to digitally catalog and manage student achievements with portfolio and resume generation features
- Built secure authentication system using JWT tokens and implemented RESTful APIs with Golang and Gin framework
- Designed responsive UI with React, Zustand for state management, and Tailwind CSS for modern styling
- Created an all-in-one solution that empowers students and modernizes institutional operations

Plantera | *React, Node.js, Express.js, JWT, ML/AI, Mapbox API, Google Earth Engine* | [Live](#) | [GitHub](#) 2025

- Developed an AI-powered sustainability application for monitoring and improving environmental practices using data analytics
- Integrated Mapbox API for interactive mapping, Google Earth Engine for real-time deforestation tracking, and ML models for tree species recommendation
- Built scalable MVP with features including community platform, tree plantation mapping, tree rescue system, and resource optimization
- Implemented JWT-based authentication and designed RESTful APIs for seamless data flow and user management

CodeSync | *React, Tailwind CSS, Node.js, Express.js, Socket.IO, Monaco Editor* | [Live](#) | [GitHub](#) 2025

- Built a real-time collaborative coding platform enabling multiple users to edit code simultaneously in secure, room-based sessions
- Implemented live code synchronization and automatic room termination using WebSockets and Socket.IO
- Designed scalable client-server architecture with Monaco Editor integration for smooth multi-user collaboration
- Developed secure room management system with real-time state synchronization across all connected clients

EDUCATION

Bannari Amman Institute of Technology

Bachelor of Technology in Artificial Intelligence and Data Science

- CGPA: 8.0/10.0**

Sathyamangalam, Tamil Nadu

2024 – 2028

ACHIEVEMENTS

DevSpark Hackathon Winner: Won first place among 120+ teams with cash prize of Rs. 10,000 (September 2024)

GitHub Foundations Certified: Certified by GitHub for foundational knowledge in version control and collaborative development

JEE Mains 2024: Achieved 96.69 percentile, ranked under 50,000 among 1.4 million+ candidates
