SUMMARY

B.Tech IT student specializing in **backend architecture**, **full-stack systems**, and **AI-integrated platforms**. Delivered **5+ production-grade projects** focused on **secure APIs**, **scalability**, and **automation**. Recognized as a national hackathon finalist and awardee for developing data-driven and AI-powered solutions.

SKILLS

Programming: C, Java, Python, JavaScript, TypeScript, SQL (Postgres), MongoDB.

Frameworks & Tools: Next.js, Node.js, React Native, Tailwind CSS, Zustand, Git, Postman, Docker, Jest.

Cloud & Databases: GCP (Cloud Run, BigQuery, Storage), MongoDB, Postgres.

Core Areas: Backend Development, API Integration, Full-Stack Development, Data Structures & Algorithms.

EXPERIENCE

Frontend Developer (Intern)

Nov 2025 – Present

GovernAI (Startup) GOVER-AI

Remote

- Built and deployed a responsive landing site for **GovernAI**, collaborating with the AI/ML team to align the platform's design and messaging with upcoming product goals.

Software Engineer (Intern)

Jun 2025 – Nov 2025

Thoothukudi Police (Cybercrime Branch) SECURE-FEST-OPS

Remote

- Built a data-driven platform for **Thoothukudi Police** to predict crowds and **optimize 1,000+ parking slots** across **5+ zones** during major events, including the **Mahakumbhabhishekham** festival at **Tiruchendur Temple**, currently integrating ML/AI for real-time forecasting.
- Enabled proactive deployment planning across **5+ high-traffic zones** and **20+ key streets**, improving public safety and reducing manual coordination by over **45%** for an estimated **50,000+ citizens**.

Backend & Product Engineer (Intern)

Feb 2025 – Oct 2025

EQ-rev (Startup) EQREV

Hybrid

- Built and deployed a scalable, secure SaaS platform for brands on **Zepto**, **Blinkit**, and **Instamart**, providing pincode-level insights across **1,000+ stores**.
- Developed automated **GCP** pipelines, reducing **100+ hours/month** of manual effort and enabling **3+ live brands**, including **Mee Mee** and **Pepe Jeans**, to make real-time, data-driven product and inventory decisions.

Full Stack Developer (Intern)

Aug 2024 – Apr 2025

Crayon'd (Startup) EMTAX

Onsite

- **Redesigned** and built scalable **backend services** for Crayon'd, replacing **10+** legacy jQuery-based modules with modern APIs, restructuring **11+** endpoints, and migrating raw **SQL** queries to **ORM**, improving system performance by **35%**.
- Developed interfaces for **tax-related** modules, including **invoices**, **WHT**, and **VAT** for **3+ foreign clients**, automating calculations and streamlining financial workflows, reducing manual effort by **50%**.

PROJECTS

AI-Driven Export & Trade Solutions for Indian SMBs

GLOBALXPORT

- Developed a modular microservices backend to streamline international export documentation, improving workflow efficiency by **40%**.
- Automated **14+** export documents using LLMs (**LLaMA, DeepSeek, Gemini, Grok**), reducing processing time from **7 days** to under **4 hours**.
- **Tech Stack:** Next.js, FastAPI AI-sdk, PyTorch, MongoDB, Pinecone, GCP.

AI-LED Scheme Recommendation & Outreach Platform | SIH24

POSTALSERVICE

- Engineered a Next.js platform to personalize **India Post's** outreach across **600K+ villages**, integrating role-based modules and experimenting with **innovative map-based visualization** for scheme delivery insights.
- Developed a LightGBM model with **RAG-based chatbot** for scheme recommendations and village-level queries, automating demographic mapping via ETL & Selenium pipelines, cutting manual effort by **80%** and boosting efficiency by **35-40%**.
- **Tech Stack:** Next.js, React, AI-sdk, Postgres, Node.js, MongoDB, Prisma, Tailwind CSS

CNC Vault: Encrypted Document Management for PLC Programs | Sakthi Hack

CNC-VAULT

- Built a secure CNC document vault leveraging **GCP** Cloud Storage for encrypted backups of PLC **logic files** and **part programs**, enabling version-controlled retrieval across **5+ factory units**.
- Implemented role-based access, activity logs, and virtual machine tracking, reducing downtime risk by **40%** and streamlining compliance with industrial data standards.
- **Tech Stack:** Next.js, Tailwind CSS, Node.js, Express, GCP, GridFS.

Elastica - Scalable Custom eCommerce Platform

ELASTICA

- Developed a fully functional, role-based **eCommerce** platform for **SRK Polymers**, enabling **50+** product and service listings with separate admin and user modules, supporting seamless product management and custom gift ordering.
- Designed and implemented **scalable** backend services and secure **APIs**, improving platform reliability and automating order and inventory workflows, reducing manual processing by **60%**.
- **Tech Stack:** Next.js, React, Node.js, MongoDB, Mongoose, Tailwind CSS, WhatsApp APIs.

EDUCATION

Bannari Amman Institute of Technology, Sathyamangalam

Erode

B. Tech Information Technology, CGPA – 8.53/10

Sep. 2023 – Present

ACHIEVEMENTS AND AWARDS

- **SIH 2024 Finalist:** Developed the **PostalService platform**, an AI/ML-powered solution personalizing India Post's outreach across **600K+ villages**, selected as one of the top finalists among **100+ teams**.
- **2nd Runner-Up - IIT Delhi Blue Print Challenge:** Secured third place in the prestigious **IIT Delhi** Blue Print Challenge, **only student-built** prototype to secure a **Top 3** position among **100+ startups**.
- **Top 50 Campus Startups:** chosen for the **Google for Startups × Campus Fund 2025**, receiving **\$250,000USD** in Google Cloud credits.
- **Thoothukudi Police Cyber Hackathon:** Built a public-focused cybercrime solution that gained recognition and opened doors to a **Cybercrime Division internship**.
- **Recognized and awarded by SP Albert John:** For the successful development and deployment of **SECURE-FEST-OPS**, a crowd and parking management system for large-scale festivals.
